PRODUKTINFORMATION

SYSTEMET:

Klims klassiske reolprogram består af en lang række grundmoduler som leveres i 8 forskellige højder, 4 forskellige bredder og 4 forskellige dybder (se side 4 og 5 for en oversigt over alle Klims grundmoduler). Ved at kombinere det meget store udvalg af grundmoduler med døre, skuffer, bakker m.m. kan man opbygge en reolopstilling, der passer nøjagtigt til de behov som du har til et smukt opbevaringsmøbel.

Til dette reolprogram kan du sætte dit personlige præg med ved valg af fronttype.

Til Klims klassiske reolprogram leveres fronttype serierne 2000, 3000 og 4000. Denne prisliste er dedikeret serie 2000. For serie 3000 og 4000 er der en separat folder med priser.

SERIE 2000:

Klims serie 2000 har massive facede kantlister på alle dørtyper, skuffer og dækplader.

Glasdørene har massive trærammer. Alle døre og skuffer har soft-luk.

Alle skuffer har fuldtudtræk.

Tilretning til hjørnemodul

Hvis et modul skal stå frit i et hjørne uden at der står nogen moduler ved siden af laves et specielt femkantet hjørnemodul.

Ligeledes hvis man ønsker at hænge et modul i et hjørne, laves dette femkantede hjørnemodul specielt dertil.

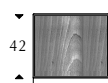

Til priserne nedenfor skal man tillægge prisen på selve modulindretningen samt evt. sokkel eller ophæng. F.eks. er der til venstre anvendt et modul 2104 og en sokkel 62021. Dvs. priserne for disse skal lægges til prisen nedenfor.

Diverse specialtillæg

Støtteliste til ophæng.

Hvis et modul udsættes for store belastninger er det muligt at montere en støtteliste nedenunder reolen. Prisen nedenfor er pr. modul uanset bredden af modulet.

Skyggeliste (slagliste til dør).

Hvis man har et bredt gennemgående rum bag to døre, kan man montere en liste bag på den ene dør. Således bliver der ikke en sprække luft mellem dørene. Prisen nedenfor er uanset højden af døren.

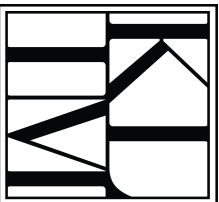

Dyvlings af dækplader.

Hvis en dækplade skal være større end 253cm i bredden, er det muligt at få leveret to dækplader der er samlet ved hjælp af dyvler, så der kun kommer en smal stribe mellem pladerne. Prisen nedenfor tillægges den samlede pris for dækpladerne.

Afkortning af dækplade i side.

Hvis en dækplade skal støde op mod et modul i den ene eller begge sider kan man få dækpladen afkortet, så den får en lige kant i de pågældende sider. Prisen nedenfor er uanset om dækpladen skal afkortes i den ene eller begge sider.
